

E. macrot

ck  
Australia

ipS  
is a good hunting and it eats everything  
er it's height. put salt in its mouth.

name: Devour.

where is it from: Malta.

How did it get here: by migrating.

What makes it a successful invasive species: It is an amphibian and it eats everything.

What problems is it causing: It spreads and breeds early and it grows quickly.

How can we stop it spreading: Cut its head off with a big chainsaw!

This is called the Tasmanian Devil.

- It can walk and swim.

- It eats fish and sharks, and Kangaroos.

- It is from Australia.

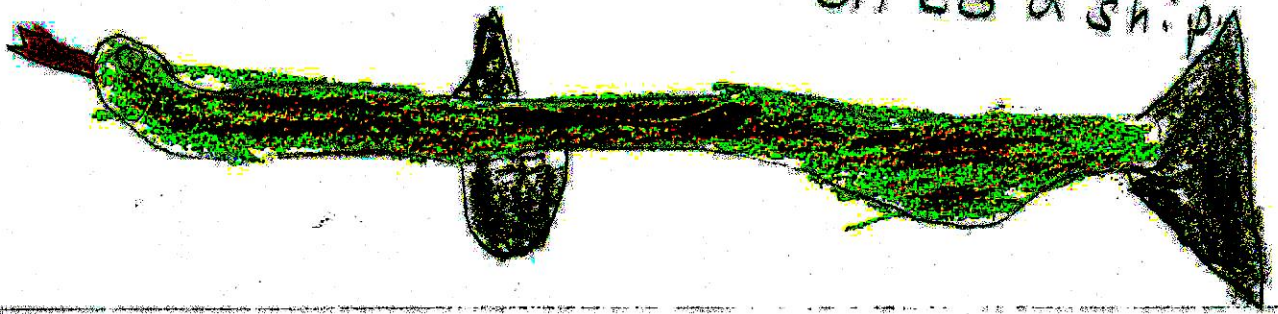

- It can swim a hundred miles an hour.

# Fishster

Where is came from?  
India

How did it get  
here?

It clinged  
on to a ship

It Likes to eat the Native's  
fishs eggs. people will have to  
catch this fish and kill it to  
get rid of it. It will  
extinct the Native fish and that  
Would not be good.
